

EZCORE II™ 15G TACTICAL DISRUPTER PRODUCT #: 2-71-05

DESCRIPTION:

EZCORE II™ 15G TACTICAL DISRUPTER is comprised of one small deployable plastic drum consisting of a central cylinder for filling with **FIXOR MP™ Binary Explosive** (included) and an outer container for filling with typical disruption materials such as water, coarse sand or gravel (disruption materials not included). A fully adjustable Detonator Holder is provided to securely position a detonator in place (detonator not included).

APPLICATIONS*:

EZCORE II™ 15G TACTICAL DISRUPTER has been proven effective at disrupting suspicious targets containing quantities of explosives in a controlled manner with minimal collateral effects. When fired in a pair, results are comparable to a "Quad Mini HEADD" disrupter shot, but with much less setup. The **EZCORE II™ 15G TACTICAL DISRUPTER** can be robot or hand deployed and fired singularly or simultaneously to effectively disrupt larger sized terrorist devices while utilizing smaller amounts of explosives all within the operational response time typically available to responding Bomb Technicians.

FEATURES:

Pourable binary explosive core load provided – no need for additional explosives. Non-explosive for transport and storage. Flexible shipping worldwide by FedEx, air cargo, truck freight and ocean freight. Becomes a safe, reliable, tactical disrupter instantly when loaded. Fully deployable packaging that is ready for detonator insertion.

* Due to the sensitive nature of proven tactics, techniques and procedures (TTPs) for utilizing MREL's Tactical Disrupters to successfully disrupt improvised explosive device threats; only general descriptions of APPLICATIONS are provided in this document. Contact MREL to describe your threats and MREL will suggest the appropriate Tactical Disrupters and TTPs to assist you.
